

Exceed Beyond

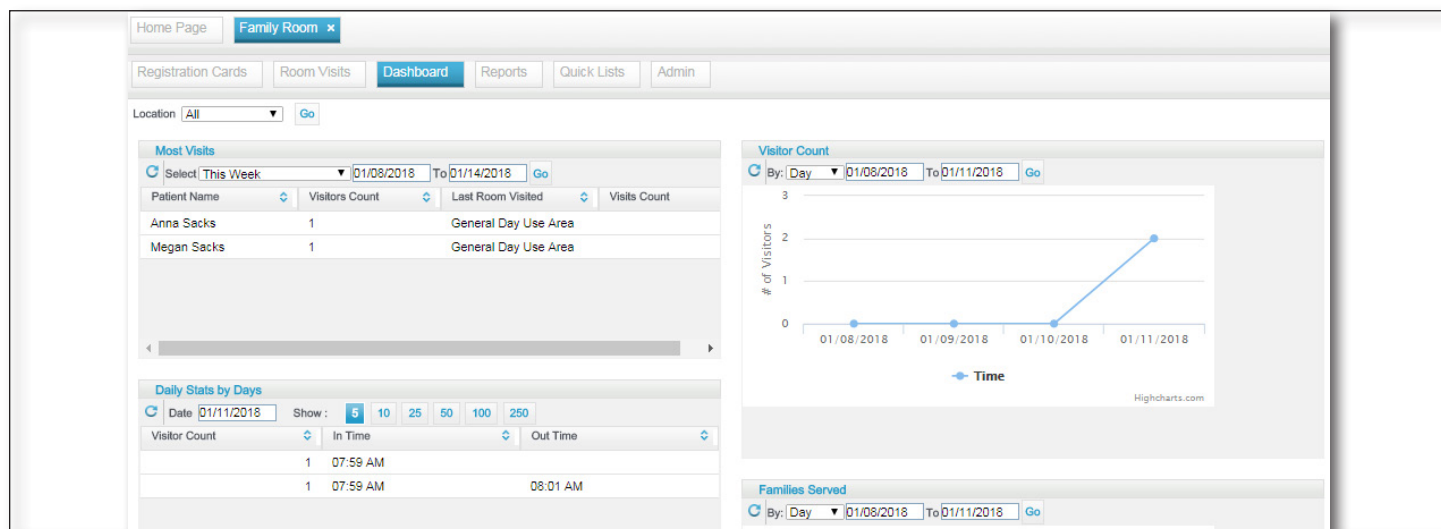

You're dedicated to your mission and we're dedicated to you. Exceed Beyond is designed specifically for nonprofit organizations like yours. It's about you and your mission.

Exceed Beyond Family Room Module

Keeping track of Family Room visits just got a lot easier with the Exceed Beyond Family Room Module. Stop using spreadsheets to track daily visits to your onsite and offsite Family Rooms and use the Family Room Module to capture valuable information about your families.

The Family Room Module is an independent module, and can be used with or without the Guest Module. Here are just some of the features in the Family Room Module:

- Easily manage and track families from multiple locations and multiple rooms.
- Analyze Family Room visit data using the Family Room Dashboard, Reports and Quick Lists.
- Transfer an existing family room visit to the Guest Module as a guest stay with the click of a button.
- Keep track of services such as laundry or DVD's used by families during their family room visits.
- Room visitors are not counted as "records" in Exceed Beyond and do not count against your Exceed Beyond record count, although visitors can be easily added as Households if needed.

About Arreva

Arreva provides industry-leading, SaaS-based online fundraising and donor relationship management software solutions that has helped thousands of nonprofits worldwide raise awareness of their mission and build valuable long-term relationships with those who contribute to their causes. The company's all-in-one, cloud-based software suite, knowledgeable support staff and dedication to customer success is unparalleled.
